Automated Planning: Theory & Practice (The Morgan Kaufmann Series in Artificial Intelligence)
Malik Ghallab, Dana Nau, Paolo Traverso

Automated planning technology now plays a significant role in a variety of demanding applications, ranging from controlling space vehicles and robots to playing the game of bridge. These real-world applications create new opportunities for synergy between theory and practice: observing what works well in practice leads to better theories of planning, and better theories lead to better performance of practical applications.

Automated Planning mirrors this dialogue by offering a comprehensive, up-to-date resource on both the theory and practice of automated planning. The book goes well beyond classical planning, to include temporal planning, resource scheduling, planning under uncertainty, and modern techniques for plan generation, such as task decomposition, propositional satisfiability, constraint satisfaction, and model checking.

The authors combine over 30 years experience in planning research and development to offer an invaluable text to researchers, professionals, and graduate students.

- Provides a thorough understanding of AI planning theory and practice, and how they relate to each other
- Covers all the contemporary topics of planning, as well as important practical applications of planning, such as model checking and game playing
- Presents case studies and applications in planning engineering, space, robotics, CAD/CAM, process control, emergency operations, and games
- Provides lecture notes, examples of programming assignments, pointers to downloadable planning systems and related information online

From reader reviews:

Earl Sanders:

The book Automated Planning: Theory & Practice (The Morgan Kaufmann Series in Artificial Intelligence) can give more knowledge and also the precise product information about everything you want. So just why must we leave the good thing like a book Automated Planning: Theory & Practice (The Morgan Kaufmann Series in Artificial Intelligence)? Some of you have a different opinion about guide. But one aim in which book can give many facts for us. It is absolutely proper. Right now, try to closer together with your book. Knowledge or info that you take for that, you are able to give for each other; you can share all of these. Book Automated Planning: Theory & Practice (The Morgan Kaufmann Series in Artificial Intelligence) has simple shape but you know: it has great and massive function for you. You can look the enormous world by open and read a reserve. So it is very wonderful.

Ernest Pettaway:

Now a day those who Living in the era exactly where everything reachable by connect to the internet and the resources inside it can be true or not require people to be aware of each details they get. How individuals to be smart in getting any information nowadays? Of course the answer then is reading a book. Looking at a book can help individuals out of this uncertainty Information particularly this Automated Planning: Theory & Practice (The Morgan Kaufmann Series in Artificial Intelligence) book as this book offers you rich details and knowledge. Of course the knowledge in this book hundred percent guarantees there is no doubt in it you know.

Bertram Staten:

Many people spending their moment by playing outside together with friends, fun activity along with family or just watching TV the whole day. You can have new activity to pay your whole day by reading through a book. Ugh, think reading a book will surely hard because you have to use the book everywhere? It ok you can have the e-book, bringing everywhere you want in your Cell phone. Like Automated Planning: Theory & Practice (The Morgan Kaufmann Series in Artificial Intelligence) which is obtaining the e-book version. So , try out this book? Let's find.

Luis Hahn:

Reading a book make you to get more knowledge from this. You can take knowledge and information coming from a book. Book is created or printed or highlighted from each source in which filled update of news. In this modern era like today, many ways to get information are available for anyone. From media social including newspaper, magazines, science book, encyclopedia, reference book, story and comic. You can add your knowledge by that book. Ready to spend your spare time to spread out your book? Or just looking for the Automated Planning: Theory & Practice (The Morgan Kaufmann Series in Artificial Intelligence) when you essential it?
