Assessing and Improving Prediction and Classification

Timothy Masters

Assessing and Improving Prediction and Classification Timothy Masters

This book begins by presenting methods for performing practical, real-life assessment of the performance of prediction and classification models. It then goes on to discuss techniques for improving the performance of such models by intelligent resampling of training/testing data, combining multiple models into sophisticated committees, and making use of exogenous information to dynamically choose modeling methodologies. Rigorous statistical techniques for computing confidence in predictions and decisions receive extensive treatment. Finally, a hundred pages are devoted to the use of information theory in evaluating and selecting useful predictors. Special attention is paid to Schreiber's Information Transfer, a recent generalization of Grainger Causality. Well commented C++ code is given for every algorithm and technique. The ultimate purpose of this text is three-fold. The first goal is to open the eyes of serious developers to some of the hidden pitfalls that lurk in the model development process. The second is to provide broad exposure for some of the most powerful model enhancement algorithms that have emerged from academia in the last two decades, while not bogging down readers in cryptic mathematical theory. Finally, this text should provide the reader with a toolbox of ready-to-use C++ code that can be easily incorporated into his or her existing programs.

From reader reviews:

Candy Yazzie:

As people who live in typically the modest era should be revise about what going on or details even knowledge to make these individuals keep up with the era which can be always change and move ahead. Some of you maybe will probably update themselves by studying books. It is a good choice for yourself but the problems coming to you actually is you don't know which one you should start with. This Assessing and Improving Prediction and Classification is our recommendation to cause you to keep up with the world. Why, since this book serves what you want and wish in this era.

Marguerite Boutte:

Reading a book to be new life style in this calendar year; every people loves to study a book. When you learn a book you can get a lots of benefit. When you read books, you can improve your knowledge, since book has a lot of information upon it. The information that you will get depend on what kinds of book that you have read. If you wish to get information about your analysis, you can read education books, but if you want to entertain yourself you are able to a fiction books, such us novel, comics, and also soon. The Assessing and Improving Prediction and Classification provide you with new experience in studying a book.

Kevin Lemon:

Is it an individual who having spare time subsequently spend it whole day through watching television programs or just telling lies on the bed? Do you need something new? This Assessing and Improving Prediction and Classification can be the solution, oh how comes? It's a book you know. You are thus out of date, spending your spare time by reading in this new era is common not a geek activity. So what these ebooks have than the others?

Leesa Banta:

You can find this Assessing and Improving Prediction and Classification by look at the bookstore or Mall. Only viewing or reviewing it can to be your solve problem if you get difficulties for ones knowledge. Kinds of this guide are various. Not only by simply written or printed but can you enjoy this book simply by e-book. In the modern era such as now, you just looking from your mobile phone and searching what their problem. Right now, choose your own ways to get more information about your publication. It is most important to arrange you to ultimately make your knowledge are still upgrade. Let's try to choose proper ways for you.
