Learning Network Programming with Java

Richard M Reese

Learning Network Programming with Java

Richard M Reese

Learning Network Programming with Java Richard M Reese

Key Features

- Learn to deliver superior server-to-server communication through the networking channels
- Gain expertise of the networking features of your own applications to support various network architectures such as client/server and peer-to-peer
- Explore the issues that impact scalability, affect security, and allow applications to work in a heterogeneous environment

Book Description

Network-aware applications are becoming more prevalent and play an ever-increasing role in the world today. Connecting and using an Internet-based service is a frequent requirement for many applications. Java provides numerous classes that have evolved over the years to meet evolving network needs. These range from low-level socket and IP-based approaches to those encapsulated in software services.

This book explores how Java supports networks, starting with the basics and then advancing to more complex topics. An overview of each relevant network technology is presented followed by detailed examples of how to use Java to support these technologies.

We start with the basics of networking and then explore how Java supports the development of client/server and peer-to-peer applications. The NIO packages are examined as well as multitasking and how network applications can address practical issues such as security.

A discussion on networking concepts will put many network issues into perspective and let you focus on the appropriate technology for the problem at hand. The examples used will provide a good starting point to develop similar capabilities for many of your network needs.

What you will learn

- Connect to other applications using sockets
- Use channels and buffers to enhance communication between applications
- Access network services and develop client/server applications
- Explore the critical elements of peer-to-peer applications and current technologies available
- Use UDP to perform multicasting
- Address scalability through the use of core and advanced threading techniques
- Incorporate techniques into an application to make it more secure
- Configure and address interoperability issues to enable your applications to work in a heterogeneous environment

About the Author

Richard M Reese has worked in both industry and academia. For 17 years, he worked in the telephone and aerospace industries, serving in several capacities, including research and development, software development, supervision, and training. He currently teaches at Tarleton State University, where he has the

opportunity to apply his years of industry experience to enhance his teaching.

Richard has written several Java books and a C Pointer book. He uses a concise and easy-to-follow approach to topics at hand. His Java books have addressed EJB 3.1, updates to Java 7 and 8, certification, functional programming, jMonkeyEngine, and natural language processing.

Table of Contents

1. Getting Started with Network Programming
2. Network Addressing
3. NIO Support for Networking
4. Client/Server Development
5. Peer-to-Peer Networks
6. UDP and Multicasting
7. Network Scalability
8. Network Security
9. Network Interoperability

From reader reviews:

Mary Deleon:

Book is actually written, printed, or highlighted for everything. You can recognize everything you want by a reserve. Book has a different type. As it is known to us that book is important matter to bring us around the world. Next to that you can your reading expertise was fluently. A publication Learning Network Programming with Java will make you to possibly be smarter. You can feel a lot more confidence if you can know about every thing. But some of you think that open or reading a book make you bored. It's not make you fun. Why they may be thought like that? Have you searching for best book or acceptable book with you?

Tom Seaman:

A lot of people always spent their free time to vacation or go to the outside with them friends and family or their friend. Are you aware? Many a lot of people spent many people free time just watching TV, or even playing video games all day long. In order to try to find a new activity honestly, that is look different you can read a book. It is really fun for yourself. If you enjoy the book which you read you can spent all day every day to reading a book. The book Learning Network Programming with Java it is quite good to read. There are a lot of people who recommended this book. We were holding enjoying reading this book. When you did not have enough space to develop this book you can buy typically the e-book. You can m0ore effortlessly to read this book from the smart phone. The price is not to fund but this book provides high quality.

Cheri Adamo:

Playing with family inside a park, coming to see the ocean world or hanging out with friends is thing that usually you may have done when you have spare time, then why you don't try issue that really opposite from that. A single activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you already been ride on and with addition associated with. Even you love Learning Network Programming with Java, it is possible to enjoy both. It is very good combination right, you still want to miss it? What kind of hang type is it? Oh can happen its mind hangout fellas. What? Still don't buy it, oh come on its known as reading friends.

Joseph Lafond:

Publication is one of source of understanding. We can add our information from it. Not only for students but additionally native or citizen need book to know the revise information of year in order to year. As we know those guides have many advantages. Beside we add our knowledge, also can bring us to around the world. With the book Learning Network Programming with Java we can consider more advantage. Don't one to be creative people? To be creative person must love to read a book. Merely choose the best book that appropriate with your aim. Don't end up being doubt to change your life at this book Learning Network Programming with Java. You can more pleasing than now.
