- **Acoustic Knowledge and Communication:** How we approach, study, and analyze sound and the challenges of writing about sound.
- **Listening and Memory:** Listening from different perspectives, from the psychology of listening to embodied and technologically mediated listening.
- **Acoustic Spaces, Identities and Communities:** How humans arrange their sonic environments, how this relates to sonic identity, how music contributes to our environment, and the ethical and political implications of sound.
- **Sonic Histories:** How studying sounding art can contribute methodologically and epistemologically to historiography.
- **Sound Technologies and Media:** The impact of sonic technologies on contemporary culture, electroacoustic innovation, and how the way we make and access music has changed.
