Multimedia Content Distribution Using Peer-to-Peer Overlay Networks: The Design and Analysis of the Next Generation Peer-to-Peer Networks

Simon G. M. Koo

Multimedia Content Distribution Using Peer-to-Peer Overlay Networks: The Design and Analysis of the Next Generation Peer-to-Peer Networks Simon G. M. Koo

The design focus on Peer-to-Peer (P2P) networks had been on low-complexity content mapping and efficient search mechanisms, and many of the existing P2P applications provide an efficient substrate for sharing small files like MP3 or images because searching efficiency is essential to the overall performance. For bulk contents like multimedia documents or scientific data sets, however, the data transfer efficiency becomes critical to the overall distribution efficiency. This work explores the use of P2P overlays on distributing bulk contents, and the goal is to improve the distribution efficiency and make P2P overlay a cost-effective alternative to Content Distribution Networks (CDNs). This work addressed two major challenges when designing p2p protocols: neighbor selection and incentive provision. The proposed protocol is light-weight, completely decentralized, and cheat-proof. Experimental results illustrate significant improvements on the distribution efficiency of our protocol over other adopted alternatives.

From reader reviews:

Daniel Spencer:

This Multimedia Content Distribution Using Peer-to-Peer Overlay Networks: The Design and Analysis of the Next Generation Peer-to-Peer Networks book is simply not ordinary book, you have after that it the world is in your hands. The benefit you receive by reading this book is information inside this publication incredible fresh, you will get info which is getting deeper a person read a lot of information you will get. This Multimedia Content Distribution Using Peer-to-Peer Overlay Networks: The Design and Analysis of the Next Generation Peer-to-Peer Networks without we know teach the one who reading it become critical in imagining and analyzing. Don't always be worry Multimedia Content Distribution Using Peer-to-Peer Overlay Networks: The Design and Analysis of the Next Generation Peer-to-Peer Networks can bring if you are and not make your carrier space or bookshelves' come to be full because you can have it with your lovely laptop even phone. This Multimedia Content Distribution Using Peer-to-Peer Overlay Networks: The Design and Analysis of the Next Generation Peer-to-Peer Networks having great arrangement in word and layout, so you will not sense uninterested in reading.

Shirley Kistner:

It is possible to spend your free time to learn this book this guide. This Multimedia Content Distribution Using Peer-to-Peer Overlay Networks: The Design and Analysis of the Next Generation Peer-to-Peer Networks is simple to deliver you can read it in the playground, in the beach, train and soon. If you did not get much space to bring the printed book, you can buy often the e-book. It is make you better to read it. You can save the book in your smart phone. Thus there are a lot of benefits that you will get when one buys this book.

Charles Collier:

As we know that book is essential thing to add our knowledge for everything. By a publication we can know everything we want. A book is a group of written, printed, illustrated or even blank sheet. Every year was exactly added. This guide Multimedia Content Distribution Using Peer-to-Peer Overlay Networks: The Design and Analysis of the Next Generation Peer-to-Peer Networks was filled concerning science. Spend your spare time to add your knowledge about your science competence. Some people has several feel when they reading the book. If you know how big good thing about a book, you can really feel enjoy to read a publication. In the modern era like at this point, many ways to get book you wanted.

Christopher Arnold:

Reading a guide make you to get more knowledge from that. You can take knowledge and information originating from a book. Book is written or printed or descriptive from each source in which filled update of news. In this modern era like at this point, many ways to get information are available for you. From media social similar to newspaper, magazines, science publication, encyclopedia, reference book, book and comic.

You can add your knowledge by that book. Isn't it time to spend your spare time to open your book? Or just searching for the Multimedia Content Distribution Using Peer-to-Peer Overlay Networks: The Design and Analysis of the Next Generation Peer-to-Peer Networks when you required it?
