Anatomy of the Mind: Exploring Psychological Mechanisms and Processes with the Clarion Cognitive Architecture (Oxford Series on Cognitive Models and Architectures) Ron Sun

This book aims to understand human cognition and psychology through a comprehensive computational theory of the human mind, namely, a computational "cognitive architecture" (or more specifically, the Clarion cognitive architecture). The goal of this work is to develop a unified framework for understanding the human mind, and within the unified framework, to develop process-based, mechanistic explanations of a large variety of psychological phenomena.

Specifically, the book first describes the essential Clarion framework and its cognitive-psychological justifications, then its computational instantiations, and finally its applications to capturing, simulating, and explaining various psychological phenomena and empirical data. The book shows how the models and simulations shed light on psychological mechanisms and processes through the lens of a unified framework.

In fields ranging from cognitive science, to psychology, to artificial intelligence, and even to philosophy, researchers, graduate and undergraduate students, and practitioners of various kinds may have interest in topics covered by this book. The book may also be suitable for seminars or courses, at graduate or undergraduate levels, on cognitive architectures or cognitive modeling (i.e. computational psychology).

From reader reviews:

Brian Davis:

Book is usually written, printed, or illustrated for everything. You can recognize everything you want by a guide. Book has a different type. As it is known to us that book is important matter to bring us around the world. Beside that you can your reading ability was fluently. A publication Anatomy of the Mind: Exploring Psychological Mechanisms and Processes with the Clarion Cognitive Architecture (Oxford Series on Cognitive Models and Architectures) will make you to be smarter. You can feel considerably more confidence if you can know about anything. But some of you think which open or reading some sort of book make you bored. It's not make you fun. Why they can be thought like that? Have you seeking best book or suited book with you?

Kristen Wright:

Anatomy of the Mind: Exploring Psychological Mechanisms and Processes with the Clarion Cognitive Architecture (Oxford Series on Cognitive Models and Architectures) can be one of your nice books that are good idea. We all recommend that straight away because this reserve has good vocabulary that will increase your knowledge in terminology, easy to understand, bit entertaining but still delivering the information. The copy writer giving his/her effort to place every word into pleasure arrangement in writing Anatomy of the Mind: Exploring Psychological Mechanisms and Processes with the Clarion Cognitive Architecture (Oxford Series on Cognitive Models and Architectures) yet doesn't forget the main position, giving the reader the hottest and based confirm resource data that maybe you can be among it. This great information can drawn you into completely new stage of crucial imagining.

Suzanne Mitchell:

Your reading sixth sense will not betray you, why because this Anatomy of the Mind: Exploring Psychological Mechanisms and Processes with the Clarion Cognitive Architecture (Oxford Series on Cognitive Models and Architectures) publication written by well-known writer we are excited for well how to make book that may be understand by anyone who else read the book. Written in good manner for you, leaking every ideas and creating skill only for eliminate your personal hunger then you still uncertainty Anatomy of the Mind: Exploring Psychological Mechanisms and Processes with the Clarion Cognitive Architecture (Oxford Series on Cognitive Models and Architectures) as good book but not only by the cover but also through the content. This is one publication that can break don't judge book by its protect, so do you still needing an additional sixth sense to pick this particular!? Oh come on your reading through sixth sense already said so why you have to listening to a different sixth sense.

Marjorie Calhoun:

What is your hobby? Have you heard that question when you got scholars? We believe that that problem was

given by teacher to their students. Many kinds of hobby, Every individual has different hobby. And you also know that little person just like reading or as studying become their hobby. You must know that reading is very important and book as to be the thing. Book is important thing to increase you knowledge, except your teacher or lecturer. You see good news or update in relation to something by book. A substantial number of sorts of books that can you go onto be your object. One of them is this Anatomy of the Mind: Exploring Psychological Mechanisms and Processes with the Clarion Cognitive Architecture (Oxford Series on Cognitive Models and Architectures).
