Applied Crystallography: Proceedings of the Xvth Conference : Cieszyn, Poland August 9-12, 1992
Henryk Morawiec

These proceedings contain a set of papers in two main fields: 1) real structure of materials and 2) research methods and equipment. In the first field special attention is paid to phase transformation in metals. In the second, the papers deal with such methods as quantitative phase identification, synchrotron technique, diffraction line analysis. This volume also includes a number of papers on computerization of experimental results, didactics and methodological problems.
