The Ethical Practice of Forensic Psychology: A Casebook (American Psychology-Law Society Series)

Few resources exist for those interested in developing their professional competence vis-à-vis ethics in forensic psychology, with the most recent text being published more than a decade ago. However, forensic psychology is changing quickly and there is a need for a current guide on ethics within the field.

The Ethical Practice of Forensic Psychology highlights the ethical standards and guidelines set forth by the American Psychological Association's (APA) *Ethical Principles of Psychologists and Code of Conduct* (EPPCC) and the *Specialty Guidelines for Forensic Psychology* (SGFP). This Casebook provides readers with a practical review of these ethical standards and professional guidelines in the context of forensic case vignettes with corresponding commentary by leaders in the field. Concepts are presented using a best-practices model that encourages and promotes engaging in empirically supported decision-making. This volume is distinct from all others published in this area, given its inclusion and integration of a review of the ethical standards and guidelines contained in the EPPCC and SGFP, in addition to numerous types of ethical dilemmas encountered in forensic practice, a review of the relevant empirical literature and case law/legal statutes, and commentary by experts in forensic psychology. This unique Casebook will prove useful for a broad audience including academics in forensic psychology, psychology graduate and post-doctoral students and trainees, practitioners, mental health counselors, social workers, and legal professionals.
