Excerpt from Observations on the Importance of Greek Literature and the Best Method of Studying the Classics

The following Observations of the celebrated Professor Wytttenbach on the Importance of Greek Literature were originally translated for the North American Review, and were published in the ninth volume of that work. The high reputation of the author, his just estimate of the writers of antiquity, and his important remarks upon the best method of studying their immortal works, have led the editors to believe, that this valuable tract might be still further useful, if published in a separate pamphlet. To the present edition is added the learned author's Exemplification of his method of explaining the Classics to his pupils; and if (as Mons. Gail justly observes in a passage we shall presently quote) all instructors of youth ought to read the Observations themselves, they ought no less attentively to peruse this Exemplification. Those respectable men among us, who are engaged in the arduous, but honourable office of instructing our youth in classical learning, will, we persuade ourselves, be highly gratified at seeing in detail the method which was followed with success by this distinguished man; who, in addition to being one of the first scholars of the age, was also for a great part of his life a practical instructor. The well considered opinions of such a man, upon a subject of so much importance, cannot but be received by our countrymen with all the respect which they ought to command.
