Cisco TelePresence Fundamentals

Tim Szigeti, Kevin McMenamy, Roland Saville, Alan Glowacki

Cisco TelePresence Fundamentals Tim Szigeti, Kevin McMenamy, Roland Saville, Alan Glowacki Cisco TelePresence™ Systems (CTS) create live, face-to-face meeting experiences, providing a breakthrough virtual conferencing and collaboration experience that transcends anything previously achievable by videoconferencing. Although the business case for deploying CTS is compelling, implementing it requires advanced knowledge of the latest networking technologies, an attention to detail, and thorough planning. In this book, four leading CTS technical experts cover everything you need to know to successfully design and deploy CTS in your environment.

The authors cover every element of a working CTS solution: video, audio, signaling protocols and call processing, LAN and WAN design, multipoint, security, inter-company connectivity, and much more. They deliver start-to-finish coverage of CTS design for superior availability, QoS support, and security in converged networks. They also present the first chapter-length design guide of it's kind detailing the room requirements and recommendations for lighting, acoustics, and ambience within various types of TelePresence rooms.

Cisco Telepresence Fundamentals is an indispensable resource for all technical professionals tasked with deploying CTS, including netadmins, sysadmins, audio/video specialists, VoIP specialists, and operations staff. This is the only book that:

- Introduces every component of a complete CTS solution and shows how they work together
- Walks through connecting CTS in real-world environments
- Demonstrates how to secure virtual meetings using Cisco firewalls and security protocols
- Includes a full chapter on effective TelePresence room design
- Walks through every aspect of SIP call signaling design, including both single-cluster and intercluster examples for use in a TelePresence environment
- Provides prequalification, room, and network path assessment considerations to help you anticipate and avoid problems

Tim Szigeti, CCIE® No. 9794, technical leader within the Cisco® Enterprise Systems Engineering team, is responsible for defining Cisco TelePresence network deployment best practices. He also coauthored the Cisco Press book End-to-End QoS Network Design. Kevin McMenamy, senior manager of technical marketing in the Cisco TelePresence Systems Business Unit, has spent the past nine years at Cisco supporting IP videoconferencing, video telephony, and unified communications. Roland Saville, technical leader for the Cisco Enterprise Systems Engineering team, tests and develops best-practice design guides for Cisco TelePresence enterprise deployments. Alan Glowacki is a Cisco technical marketing engineer responsible for supporting Cisco TelePresence customers and sales teams.

- Use Cisco TelePresence Systems (CTS) to enhance global teamwork and collaboration, both within your own enterprise and with your customers, partners, and vendors
- Understand how the various components of the Cisco TelePresence Solution connect and work together
- Integrate CTS into existing LAN, enterprise, and service provider networks
- Successfully design and deploy a global TelePresence network
- Understand the importance of room dimensions, acoustics, lighting, and ambience and how to properly

design the physical room environment

- Provide the high levels of network availability CTS requires
- Leverage the Cisco quality of service (QoS) tools most relevant to CTS network provisioning and deployment
- Systematically secure CTS using TLS, dTLS, sRTP, SSH, and Cisco firewalls

This book is part of the Cisco Press® Fundamentals Series. Books in this series introduce networking professionals to new networking technologies, covering network topologies, sample deployment concepts, protocols, and management techniques.

From reader reviews:

Shawn Hunter:

Spent a free the perfect time to be fun activity to accomplish! A lot of people spent their down time with their family, or their friends. Usually they accomplishing activity like watching television, going to beach, or picnic within the park. They actually doing ditto every week. Do you feel it? Do you need to something different to fill your own free time/ holiday? May be reading a book might be option to fill your no cost time/ holiday. The first thing that you'll ask may be what kinds of book that you should read. If you want to try look for book, may be the book untitled Cisco TelePresence Fundamentals can be great book to read. May be it might be best activity to you.

Kenneth Williams:

In this age globalization it is important to someone to find information. The information will make someone to understand the condition of the world. The condition of the world makes the information better to share. You can find a lot of references to get information example: internet, classifieds, book, and soon. You can view that now, a lot of publisher in which print many kinds of book. Typically the book that recommended for your requirements is Cisco TelePresence Fundamentals this guide consist a lot of the information of the condition of this world now. This particular book was represented how can the world has grown up. The terminology styles that writer make usage of to explain it is easy to understand. The writer made some investigation when he makes this book. That is why this book ideal all of you.

Timothy Parker:

Many people spending their time frame by playing outside along with friends, fun activity together with family or just watching TV the entire day. You can have new activity to shell out your whole day by looking at a book. Ugh, think reading a book can definitely hard because you have to bring the book everywhere? It fine you can have the e-book, taking everywhere you want in your Mobile phone. Like Cisco TelePresence Fundamentals which is obtaining the e-book version. So , try out this book? Let's see.

Kara Hogan:

As a student exactly feel bored to reading. If their teacher requested them to go to the library or make summary for some guide, they are complained. Just very little students that has reading's soul or real their passion. They just do what the instructor want, like asked to the library. They go to right now there but nothing reading seriously. Any students feel that reading is not important, boring along with can't see colorful photographs on there. Yeah, it is to become complicated. Book is very important for yourself. As we know that on this era, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. Therefore this Cisco TelePresence Fundamentals can make you really feel more interested to read.
