Visualization of Receptors Gerard Morel

A multiplicity of methods for visualization are described in Visualization of Receptors. This book of techniques covers immunocytology, radioautography, in situ hybridization, plasmon resonance, RT in vitro PCR, and X-ray crystal structure analysis. Lecturers, researchers, practitioners, technicians, and students will find all the principles and protocols they require and the means of implementing them.

Topics discussed include localization of ligands (in vitro or in vivo), visualization of immunoreactivities of ligand and receptor proteins, detection and quantification of mRNA expression, amplification of signals, and determination of 3-D structure.

Details of protocols with illustrations of results and commentaries are provided throughout the book.
