Infection Control, Science, Management and Practice

Janet McCulloch

Infection Control, Science, Management and Practice Janet McCulloch

This book examines the science, management and practice of the control of infection. The early part of the book is concerned with the science of infection control, providing the underpinning knowledge base as well as information regarding the laboratory services which will be of practical help to the reader. The book then discusses the role of the Infection Control Team, outbreak control and policy issues that are required in order to maintain a safe environment.

The second half of the book concentrates on the practical application of the previously described principles to the reduction of infection risks and management of known infections in a range of clinical and social situations. The book reflects the current dynamics in health care provision and will equip the reader with the knowledge base to develop their skills in the control of infection in a variety of healthcare settings.
