The Sense and Nonsense of Christian Science (Classic Reprint) Leon C. Prince

The Sense and Nonsense of Christian Science CHAPTER IF ourS chools of Mental Healing IT is perhaps a truism to repeat that the present age has accomplished, to a degree never approximated by all the previous centuries combined, the conquest of physical nature. The ingenuity of man exerted in every conceivable quarter of materialistic enterprise has seemingly reduced the area for further achievement to a calculable minimum. He has tamed and harnessed hitherto intractable forces, robbed the sea of her mysteries and the darkness of its terrors, and conjured magic properties and powers from the laboratories of the earth. The North Pole, so long the elusive phantom of those who followed the lure of the undiscovered, has capitulated at last to the determined guest of the latest and most persistent of Arctic adventurers ;and even the birds of the air confess that the human aviator has broken their monopoly of aerial flight. So constant and complete has been this triumph that it seems as though external nature had finally surrendered to the genius and audacity of man, so that ambition must shortly halt and like Alexander of old utter the plaintive lament, There are no more worlds to conquer.
