# Topological Spaces: From Distance to Neighborhood (Undergraduate Texts in Mathematics)

*Gerard Buskes, Arnoud van Rooij*

**Topological Spaces: From Distance to Neighborhood (Undergraduate Texts in Mathematics)** Gerard Buskes, Arnoud van Rooij

gentle introduction to the subject, leading the reader to understand the notion of what is important in topology with regard to geometry. Divided into three sections - The line and the plane, Metric spaces and Topological spaces -, the book eases the move into higher levels of abstraction. Students are thereby informally assisted in learning new ideas while remaining on familiar territory. The authors do not assume previous knowledge of axiomatic approach or set theory. Similarly, they have restricted the mathematical vocabulary in the book so as to avoid overwhelming the reader, and the concept of convergence is employed to allow students to focus on a central theme while moving to a natural understanding of the notion of topology. The pace of the book is relaxed with gradual acceleration: the first nine sections form a balanced course in metric spaces for undergraduates while also containing ample material for a two-semester graduate course. Finally, the book illustrates the many connections between topology and other subjects, such as analysis and set theory, via the inclusion of "Extras" at the end of each chapter presenting a brief foray outside topology.

### **From reader reviews:**

#### **Danielle Rhodes:**

Do you have favorite book? If you have, what is your favorite's book? Publication is very important thing for us to learn everything in the world. Each reserve has different aim or goal; it means that e-book has different type. Some people really feel enjoy to spend their a chance to read a book. They can be reading whatever they get because their hobby is definitely reading a book. How about the person who don't like studying a book? Sometime, man or woman feel need book once they found difficult problem or exercise. Well, probably you should have this Topological Spaces: From Distance to Neighborhood (Undergraduate Texts in Mathematics).

#### **Geneva Ricks:**

This Topological Spaces: From Distance to Neighborhood (Undergraduate Texts in Mathematics) book is absolutely not ordinary book, you have after that it the world is in your hands. The benefit you receive by reading this book is usually information inside this guide incredible fresh, you will get details which is getting deeper an individual read a lot of information you will get. This Topological Spaces: From Distance to Neighborhood (Undergraduate Texts in Mathematics) without we realize teach the one who reading it become critical in thinking and analyzing. Don't end up being worry Topological Spaces: From Distance to Neighborhood (Undergraduate Texts in Mathematics) can bring if you are and not make your carrier space or bookshelves' grow to be full because you can have it within your lovely laptop even cellphone. This Topological Spaces: From Distance to Neighborhood (Undergraduate Texts in Mathematics) having very good arrangement in word as well as layout, so you will not sense uninterested in reading.

#### **Ann Foley:**

Reading a book for being new life style in this year; every people loves to learn a book. When you learn a book you can get a wide range of benefit. When you read textbooks, you can improve your knowledge, because book has a lot of information onto it. The information that you will get depend on what kinds of book that you have read. If you would like get information about your analysis, you can read education books, but if you act like you want to entertain yourself you can read a fiction books, this sort of us novel, comics, and soon. The Topological Spaces: From Distance to Neighborhood (Undergraduate Texts in Mathematics) provide you with new experience in examining a book.

#### **Robert Quinonez:**

Book is one of source of expertise. We can add our information from it. Not only for students and also native or citizen will need book to know the change information of year for you to year. As we know those textbooks have many advantages. Beside we all add our knowledge, also can bring us to around the world. With the book Topological Spaces: From Distance to Neighborhood (Undergraduate Texts in Mathematics) we can consider more advantage. Don't you to definitely be creative people? To be creative person must

choose to read a book. Just simply choose the best book that suited with your aim. Don't possibly be doubt to change your life with that book Topological Spaces: From Distance to Neighborhood (Undergraduate Texts in Mathematics). You can more inviting than now.
