Retroperitoneoscopy and Extraperitoneal Laparoscopy in Pediatric and Adult Urology

Retroperitoneoscopy and Extraperitoneal Laparoscopy in Pediatric and Adult Urology

Laparoscopy is a new frontier of the surgical technique, which recently gained more and more popularity and credit upon the surgical teams, also in Urology. The reason stays in the reduced invasivity and in the advances on the techniques of "video-assisted surgery". More recently the retroperitoneal access to laparoscopy surgery ("retroperitoneoscopy" or "retroperitoneal laparoscopy") opened a new surgical approach to several diagnostic and operative procedures for a large number of urogenital tract diseases. The applications in pediatric and in adult age and the technical challenges are widely debated at the moment. The volume gathers contributions by internationally renowned authors and is a complete overview of the technique. The book addresses urologists, general and abdominal surgeons, pediatric urologists and pediatric surgeons who are interested in minimally invasive procedures and particularly in retroperitoneal laparoscopy.
